

WHAT IS 5G ?
WHY DO WE NEED TO PROTEST ?
WHAT TO DO?

Today, man-made electromagnetic fields (EMF) are at astronomical levels. Our health is deteriorating. Some people even have what they refer to as *Electro-hypersensitivity syndrome (EHS)*, and we all do to some degree.

Now, to make things worse, there is an immediate plan to install the next generation of wireless technology which is called 5G — meaning the “Fifth Generation” — which is the latest generation of cellular mobile communications. The crucial fact to comprehend is that 5G is not just one number ahead of 4G, the fourth generation which we now use for our computer and smartphone. 5G is in another realm, providing speeds over 100 times faster than current data speeds.

This 5G technology which is, at once, immune weakening, carcinogenic, genotoxic, and a neurotoxin, is being sales-pitched as “faster and better.” And so it is, but at great expense to human health and the local environment.

In reality, we humans and all life will be compromised to the point of being extinguished. For a clear and scientific discussion of the proven health hazards, please read this International Appeal signed by 63,000 scientists and experts from 168 countries, with over 100 references.
